

LUXURY SEATING

CINEAK originated in 1999, when a European-based custom electronics integration company was in need of luxury home theater seats for an exclusive private home theater. Unable to find anything worthy for this project, a team of Belgian designers was contacted to develop a chair with an exquisite design, while focusing on the comfort and luxury of the seat. After many months of further refining the design and prototyping of the chair, a new and innovative product was born ... the FORTUNY Deluxe chair.

As a result, CINEAK was founded with a mission to provide custom designed home theater and lounge seating products that blend technology, aesthetic elegance, comfort, luxury, and the finest materials with quality craftsmanship.

With offices in Belgium and the United States, CINEAK's products are available through an extensive network of world-wide authorized dealers, representing a true global family-owned brand.

Our product offering is a result of many years of research, development, and applying new design concepts to traditional luxury seating products. Throughout the development and production process the following key factors are considered in order to provide a reliable and satisfying product while ensuring years of enjoyment.

AESTHETIC DESIGN
COMBINED WITH
COMFORT,
LUXURY
AND
CRAFTSMANSHIP

AESTHETIC DESIGN - Design is not just a fashion instrument for CINEAK, but a corporate philosophy, and management tool. All our designs are contemporary, innovative, and timeless. CINEAK seats are primarily functional, comfortable, and ergonomic. During the concept phase, each model is assessed for its aesthetic quality, compatibility with surroundings, visual coherence, and personalization options. Our designs are exclusive to the brand, they are designed in-house and in conjunction with world-renowned designers.

ULTIMATE COMFORT - In addition to aesthetic design, our products encompass a high-level of comfort through attention to ergonomics. The use of different foam densities combined with quality materials, European leather/upholstery, German engineered motors and drivers, and steel reclining mechanisms, are a few additional touches that guarantee the best in quality. Our seats have zigzag seating support and webbed backrest support for ultimate comfort and durability. Continuous testing ensures that our products meet the toughest standards in quality and longevity.

LUXURY - The extent of customization and personalization of our products coupled with the amount of options that can be added defines a new level of luxury seating. Whether it is changing the height of the backrest, having different seating widths, mixing leather/fabric colours and materials, adding electronic lumbar support, or controlling the reclining of the chair from a control touch panel, these are just the beginning to the flexibility offered, and lead to a luxurious experience.

CRAFTSMANSHIP - All our products are hand-built and hand-finished at our European ISO-9002 certified facility by the best crafts people in the industry. As each chair is hand-made to order, great attention is paid to every detail when creating your unique theater chair. This approach makes every one of our products so special, and every one of our customers satisfied.

REDEFINING CUSTOM THEATER SEATING

The FORTUNY theater chair was created to fit a luxurious home theater. It's concept is unique in many aspects. The combination of leather upholstery, varying stitching finishes, ergonomic shapes, wood veneer, and an independently controlled reclining mechanism, give this chair its elegant look and sublime comfort. This chair was designed by the Mitra Theaters team as a seating solution for their exclusive high-end home theater projects.

FORTUNY DELUXE

Careful attention has been given to the overall comfort of this chair. Ergonomics have been thoroughly studied during the design and development process. High quality foam with different densities in combination with zigzag seating support and webbed backrest support are used to create a comfortable and soft feel which maintains a proper balance for ones body.

A steel frame and reclining mechanism ensures a smooth operation now and in the future. The independently controlled reclining mechanism allows the user to adjust the backrest independently from the footrest, giving the user full freedom and the ability to adjust the chair to a position that fit one's body structure. The articulating headrest is a necessity to ensure ultimate comfort while viewing a movie in the reclined position. It gives the neck support needed, and guarantees a perfect viewing angle to the filmscreen.

THE FORTUNY INCLINER:

The FORTUNY Incliner is designed to accompany the original FORTUNY Deluxe chair. The mechanism allows you to save space behind the chair and enables you to position the seat closer to a wall. All other aspects in regards to comfort and design are kept the same. The chair comes with our dual motorized mechanism, and an articulating headrest to ensure ultimate comfort while viewing a movie in the relaxed position.

FEATURES

Fine European pigmented and semi-aniline leathers, available in 3 leather grades ranging in 50 colours. A wide selection of quality fabrics, or customer upholstery options is available.

Reclining mechanism is available in manual pneumatic or dual motorized versions. Both manual and motorized systems allow for the backrest and footrest to operate independently from one-another.

A black or silver push button control module for operation of reclining mechanism is seamlessly integrated into the armrest. By pressing the reset button, both foot- and backrest return to their original position.

Raised backrest with articulating headrest allows for desired viewing condition with optimized head and back support.

Hand-cut premium HR foam cushioning combined with zigzag springs and webbed back support promises years of comfort and performance.

Custom made to order allows for a range of personalization to fit individual taste and home theater design requirements.

Armrests are available in oak or cherry wood veneer, finished in 8 standard colours. This allows the chair to blend into any theater environment. Matching colour and wood veneer types are optional.

CLASSICAL DESIGN WITH COMFORT AND LUXURY

This fully upholstered seat is built with the same reclining mechanism as our flagship product, the FORTUNY Deluxe, offering the same flexibility and comfort. The steel frame and reclining mechanism ensures a smooth operation now and in the future. Our reclining system, available in dual motor or manual pneumatic version, allows you to adjust your backrest independently from the foot rest, giving you full freedom.

An articulating headrest provides neck support while reclined, and guarantees a perfect viewing angle to the filmscreen.

VEDETTE[®] CHAIR

FEATURES

Fine European pigmented and semi-aniline leathers, available in 3 leather grades ranging in 50 colours. A wide selection of quality fabrics, or customer upholstery options is available.

Manual pneumatic, or dual motorized reclining mechanism, allows the seat to adjust to the perfect viewing position, while ensuring ultimate comfort.

Black or silver push button control module for operation of reclining mechanism is seamlessly integrated into the armrest. By pressing the reset button, both foot- and backrest return to their original position.

Raised backrest with articulating headrest is available in two designs and allows for desired viewing condition with optimized head and back support.

Double backrest cushioning, with high-density foam and a zigzag seat support, promises years of comfort and performance.

VEDETTE CHAIR

TIMELESS DESIGN WITH HISTORICAL ROOTS

The “Bruges” chair, is named after the enchanting and classical city of Bruges. This canal-based city, located in the province of West Flanders in the Flemish Region of Belgium, is often referred to as “The Venice of the North”. It’s architecture reflects its splendor during the medieval era of Western Europe.

The “Bruges” chair features a steel motorized incline mechanism. The lower back allows for acoustical freedom, while not losing the necessary support. For those who need extra support, an optional headrest is available.

The “Bruges” chair is available as a stand-alone chair, or can be configured into straight or curved row seating.

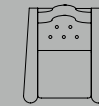

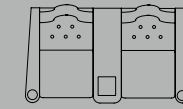

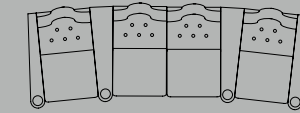

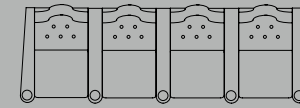

BRUGES®

BRUGES®

DESIGN IN PARTNERSHIP WITH JAMES THEOBALD:

Working alongside most notably Theo Kalomirakis, James felt the need to design a more classical chair for use in their projects. A timeless design was sketched and together with our master craftsman, the “Bruges” chair was created. Beautiful piped stitching follows the chair curves, while the back cushion is detailed with tufted buttons to complete the look. The seat offers comfort from a zigzag seat support and a webbed backrest, for hours of enjoyment.

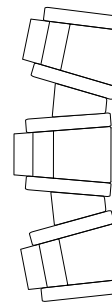

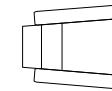

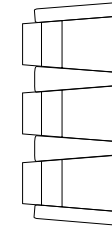

INSPIRED BY THE OPULENCE OF THE PAST

The “DITO club” chair is inspired by 19th Century English chairs found in clubs where members engaged socially in deep philosophical conversations with like-minded folks. The “DITO club” chair presents a personal getaway for engaging with guests, reading a book, relaxing or enjoying your favorite show or movie. The “DITO club” also brings back the seating arrangements found in private screening rooms of the 1930s.

The “DITO club” chair has a unique built-in motorized mechanism, which creates a smooth long comfortable footrest. A zigzag seat support and a webbed backrest combined with high quality foam makes the “DITO club” very comfortable for hours of enjoyment.

DITO[®]CLUB

DITO[®]CLUB

Designed as a stand-alone chair, the “DITO club” chair can also be configured into rows of seating using connection tablets.

Curved or straight rows with floating tablets between each seat provide a sensible place to put drinks, snacks, remotes, etc.

The armrest of the “DITO club” features solid Afromosia wood combined with ebony wood inlays at the front and back.

The “DITO club” chair is available in our “Pilot leather”, a unique full grain, drum-dyed silky Nappa leather, with a wax/oil finish, and in our standard leather grades.

BRINGING VERSATILITY TO THE HOME THEATER

INTIMO®

Comfort, flexibility, design and much more ...
This unique sectional sofa adds a new concept in seating for the home entertainment environment. Due to its modularity, numerous seating layouts can be built. Comfortable rows can be transformed into lounge beds with ease. Depending on the number of people, you can mix and match to create more or less seating with the same amount of units.

The INTIMO sofa is made from upholstered bases with pocket springs to give ultimate comfort and support. The seating and back cushions are a combination of high density polyurethane foam and natural goose down. This creates a comfortable and cosy chair with a soft feel. The seating cushions are available in a soft and medium- soft version.

INTIMO is available in a wide selection of high-end designer fabrics, and customer supplied upholstery.

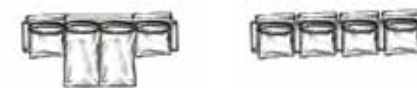

INTIMO

ULTIMATE MODULARITY:

Design your own home theater layout! Let your imagination flow to create new and more functional layouts for any occasion. The INTIMO consists of modular bases that allow you to choose between 1, 2, 2-xl or lounge seats to create different configurations. Arms and backrests can be applied on every seat, some seats or none - you decide. The back cushions are available in different versions and enable you to create the most comfortable seating positions.

Combine the INTIMO sofas with our other chairs to create a mix of seating possibilities. With these chairs you will never want to leave your home theater!

MODERN DESIGN - HIDDEN FUNCTIONALITY

STRATO

A first-of-its kind line of cinema seating, the STRATO's truly modular design combines the plush comfort of a couch with the functionality of a traditional upright theater seat.

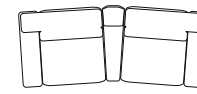

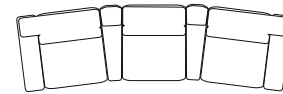

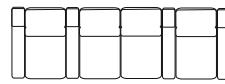

Created by CINEAK in association with a team of renowned designers, the STRATO develops a look with form and function. The vision behind the design of the STRATO can be best described as “a beautiful abstract design, hiding complete functionality.”

Fan Shun - www.fsihome.com.tw

Elegant lines, unparalleled seating comfort and a modular concept that makes for a wealth of potential applications are the attractive features of this outstanding sofa. In addition to its clean-cut form, this design is appealing thanks to its concealed dual motorized incline relax system. This system allows the user to control the movement of the seating part, position of the footrest and adjust the height of the headrest independently. All are controlled from a seamlessly integrated push-button in the armrest

STRATO

CUSTOMIZE YOUR SEATS:

Since all of our chairs are custom made, we offer a great deal of customization.

- Custom seating dimensions; we offer adjustments in seating width, backrest height, and a tailored athlete version of the chair
- Embroidery; names and/or logos can be embroidered on both leather and fabric, whether it is on the headrest, armrest or leg rest, you choose
- Contrast stitching/piping; a wide selection of colours allows for stylish contrast stitching, for the entire seat or for particular parts of the chair
- Customer upholstery; designers may supply their own leather or fabric; a sample chair can be made on request
- Custom wood colouring; we can match any colour provided to be used as wood colour for the armrest or console
- Custom wood veneer: we can make the FORTUNY armrests in almost any wood veneer type
- Foam density: three different adjustments to firmness of the foam or Tempur-Pedic™ foam

OUR CUSTOM CONTRACT FURNITURE DEPARTMENT:

Custom designed furniture - CINEAK can design and build any type of furniture to your requests. Our custom contract furniture department will build your furniture the way you would like it to be. Designers can provide us with detailed drawings on what the furniture must look like, and we will build it to the set forth specifications. These unique creations will be exclusive to your use and enjoyment.

- Modifications to our standard products:

LUXURY AUDITORIUM SEATING:

A luxureous, comfortable auditorium seat made for small and large venues where stylish and luxurious characteristics are required.

- row seating configurations
- genuine leather, artificial leather or fabric upholstery available
- upon request; tables, drink holders, etc.

CINE AUDI

A SEAT - designed by Maarten van Severen

CINEAK ACOUSTIC DESIGN PANELS

In many home theaters today, we see improper or no acoustical treatments. It is generally known that the best way to improve the sound quality in a room is through placing acoustical elements. No matter how good your speakers are, when the room does not allow good sound, they will never perform as they should. With CINEAK acoustic design panels you will be able to create a better sounding room, while simultaneously decorating the walls using a collection of quality fabrics.

CINEAK acoustic absorption panels are decorative boards which work acoustically by absorbing both low and high frequencies. Using our panels will improve the quality of your entertainment and living room. They offer an attractive solution to improve tonal balance, movie dialog intelligibility, and to minimize sound reflections. As our absorption panels are used to reduce flutter echoes which are caused by repetitive reflections between hard parallel walls, using too many of these panels may produce an acoustically “dead” space. For this reason we created the diffuser panel, to provides flutter echo control as well as bass absorption. Using these on parrallel walls converts small rooms with flat parallel surfaces into functional spaces with good speech intelligibility, sound quality, and a natural, comfortable ambiance. Since these panels are finished the same way as the absorption panels, you will not be able to tell the difference, allowing a uniform designed room.

OUR ECO-FRIENDLY SOLUTION

Our environmentally friendly acoustic panels are produced without emitting formaldehyde or other toxic gases.

Safe for the environment, safe for us! When using these panels, no protective equipment is necessary.

It does not scratch or abraid when handling and does not cause any itching of the skin.

Its acoustic qualities are excellent, and are better for home cinema use than your standard fibre glass acoustic panels.

LOUNGE by CINEAK

CINEAK also offers a wide range of lounge seating products. These chairs combine luxury, technology and design to offer comfortable, and ergonomic chairs for every room.
