Upholstery Fabrics

Fifth-Avenue

Striped velvet, where some stripes rise above others for a particular 3D effect. They in fact stand out against the ground in that created by the combination of the cut velvet pile with the chenille pile. As well as producing a raised surface, the combination of velvet and chenille creates a rich variety of shines which add to the geometric decoration. The sophisticated mix of colours comes from the blending and interweaving of warps and wefts of different shades. Suitable for heavy use, it is available in 6 colours.
